Fast-moving Noise Overload

Saturation Missed-opportunity Manual

Delay Complexity Friction Chaos

Fragmented Time-consuming Asymmetry

Latency Uncertainty Opacity

#### LEVERAGING SOCIAL LISTENING TO UNCOVER HIDDEN GEMS

#### **SOCIALS**

Projects launch socials on X, Telegram

#### **FOLLOW**

KOLs and smart investors follow the project

#### **MAKE DEAL**

KOLs make promo deal with projects

#### **TWEET**

KOLs start promo and bring attention to the masses

Databot is an Al-powered platform for alpha hunters, leveraging automation and proprietary methods to track KOLs, trends, and early-stage opportunities.

#### EMPOWERING WEB3 KEY PLAYERS

#### **Investors & Traders**

- Degens & traders
- Looking for alpha before it trends
- Rely on alpha signals & early insight

#### **Builders & Researchers**

- Project founders, analysts
- Due diligence & market context
- Track narratives, influencers, and tokens

#### **KOLs & Marketers**

- Growth teams, PR, and brand leads
- Discover which influencers matter
- Benchmark KOL performance

YOUR COMPETITIVE EDGE ON THE MARKET

## **KOL Tracking & Analytics**

Monitor the activities of over 500 Key Opinion Leaders (KOLs) on X (formerly Twitter), including new follows and tweets, to identify emerging trends early.

## **Social Trends Analysis**

Analyze trending projects across different segments and time frames to understand market sentiment and momentum.

## Al-Generated Reports

Receive daily summaries of early discoveries and valuable insights, generated by advanced language models for quick comprehension.

## Automated Project Discovery

Leverage social media listening to automatically identify and surface new crypto projects, ensuring you stay ahead of the curve.

## **Social Signals**

Get real-time alerts when multiple KOLs engage with a new project within a short timeframe, signaling potential opportunities.

## © Contract Address Mapping

Connect social media accounts to their corresponding token contracts, enabling comprehensive on-chain and off-chain analysis.

#### TOOLS DESIGNED FOR ALPHA SEEKERS

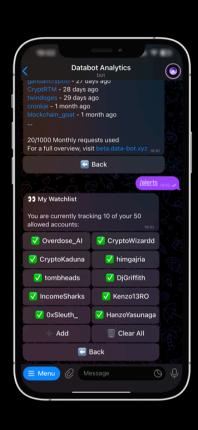

#### Web3 Dashboards

Providing a comprehensive view of the latest web3 trends, with real-time social analytics

## **Telegram Bots**

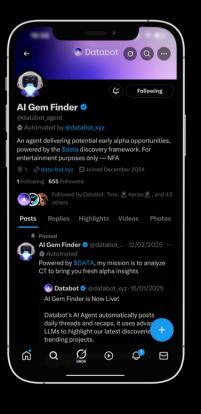

Delivering recaps, real-time alerts, social signals, and custom tracking features

### **Private Groups**

Telegram groups securely managed by our in-house token gating system

## **Automated X Account**

Posting recaps early discoveries daily, using LLMs to summarize valuable insights

AN IN-HOUSE TECH STACK BUILT FOR AUTOMATION, SCALABILITY AND SECURITY

## **\*** Key Components

- Integrated Data Streams

  Live tracking of influencer and project activity
- Real-Time Dashboards
   Dynamic interfaces that surface alpha and insights
- Responsive dApp & PWA
   Fully accessible across desktop and mobile
- Token-Gated Access
  Secured through wallet-based access tiers
- Multichain On-Chain Payments
  Secured through wallet-based access tiers

## Tech Stack

| Layer     | Stack Details                         |
|-----------|---------------------------------------|
| Frontend  | Next.js, Tailwind CSS                 |
| Backend   | TypeScript, Feathers.js, PostgreSQL   |
| Data / IA | Qlik (BI & Viz), Ollama (LLM runtime) |

# \* CHALLENGES

|            | Challenge   | How We Solved It  |
|------------|---|---|
| General    | Most crypto projects fade after initial hype      | We stayed focused post-launch, kept building beyond the hype, and maintained long-term vision |
|            | Web3 evolves too fast to follow manually          | Built a modern, scalable tech that lets us pivot and adapt instantly to new opportunities     |
| Technical  | Data is noisy, fragmented, and unstructured       | Developed automated pipelines and clean visualizations to extract actionable insights         |
|            | X API costs created scalability challenges        | Engineered a high-efficiency custom data acquisition pipeline to overcome API limitations.    |
| Managerial | 100% bootstrapped: no VC, no financial incentives | Assembled a mission-driven team motivated by vision and product, not salary                   |
|            | Maintaining motivation during bear markets        | Stayed committed to the long game and used the bear market as an opportunity to build         |

A HYBRID WEB3 APPROACH

#### 1. Token-Gated Access

Unlock access to premium features by holding \$DATA

→ Encourages holding and long-term engagement

### 2. Subscription Option

Pay monthly in stablecoins or \$DATA tokens

→ More flexibility, incentivizing token usage

#### 3. Future Revenue Streams

Advertising Opportunities & Business API

→ Expands monetization & increases utility

#### Tokenomics

| Token | \$DATA            |
|-------|-------------------|
| Chain | Ethereum (ERC-20) |
| Taxes | 1% Buy / 4% Sell  |

### Tax Allocation

| Team & Development           | 40% |
|------------------------------|-----|
| Marketing & Ecosystem Growth | 40% |
| Revenue Share & Liquidity    | 20% |

## MARKETING STRATEGY

A COMMUNITY FOCUSED APPROACH

## **EVOLUTION & ROADMAP**

FROM EARLY PLAYERS TO SERIOUS BUILDERS

STEALTH
